
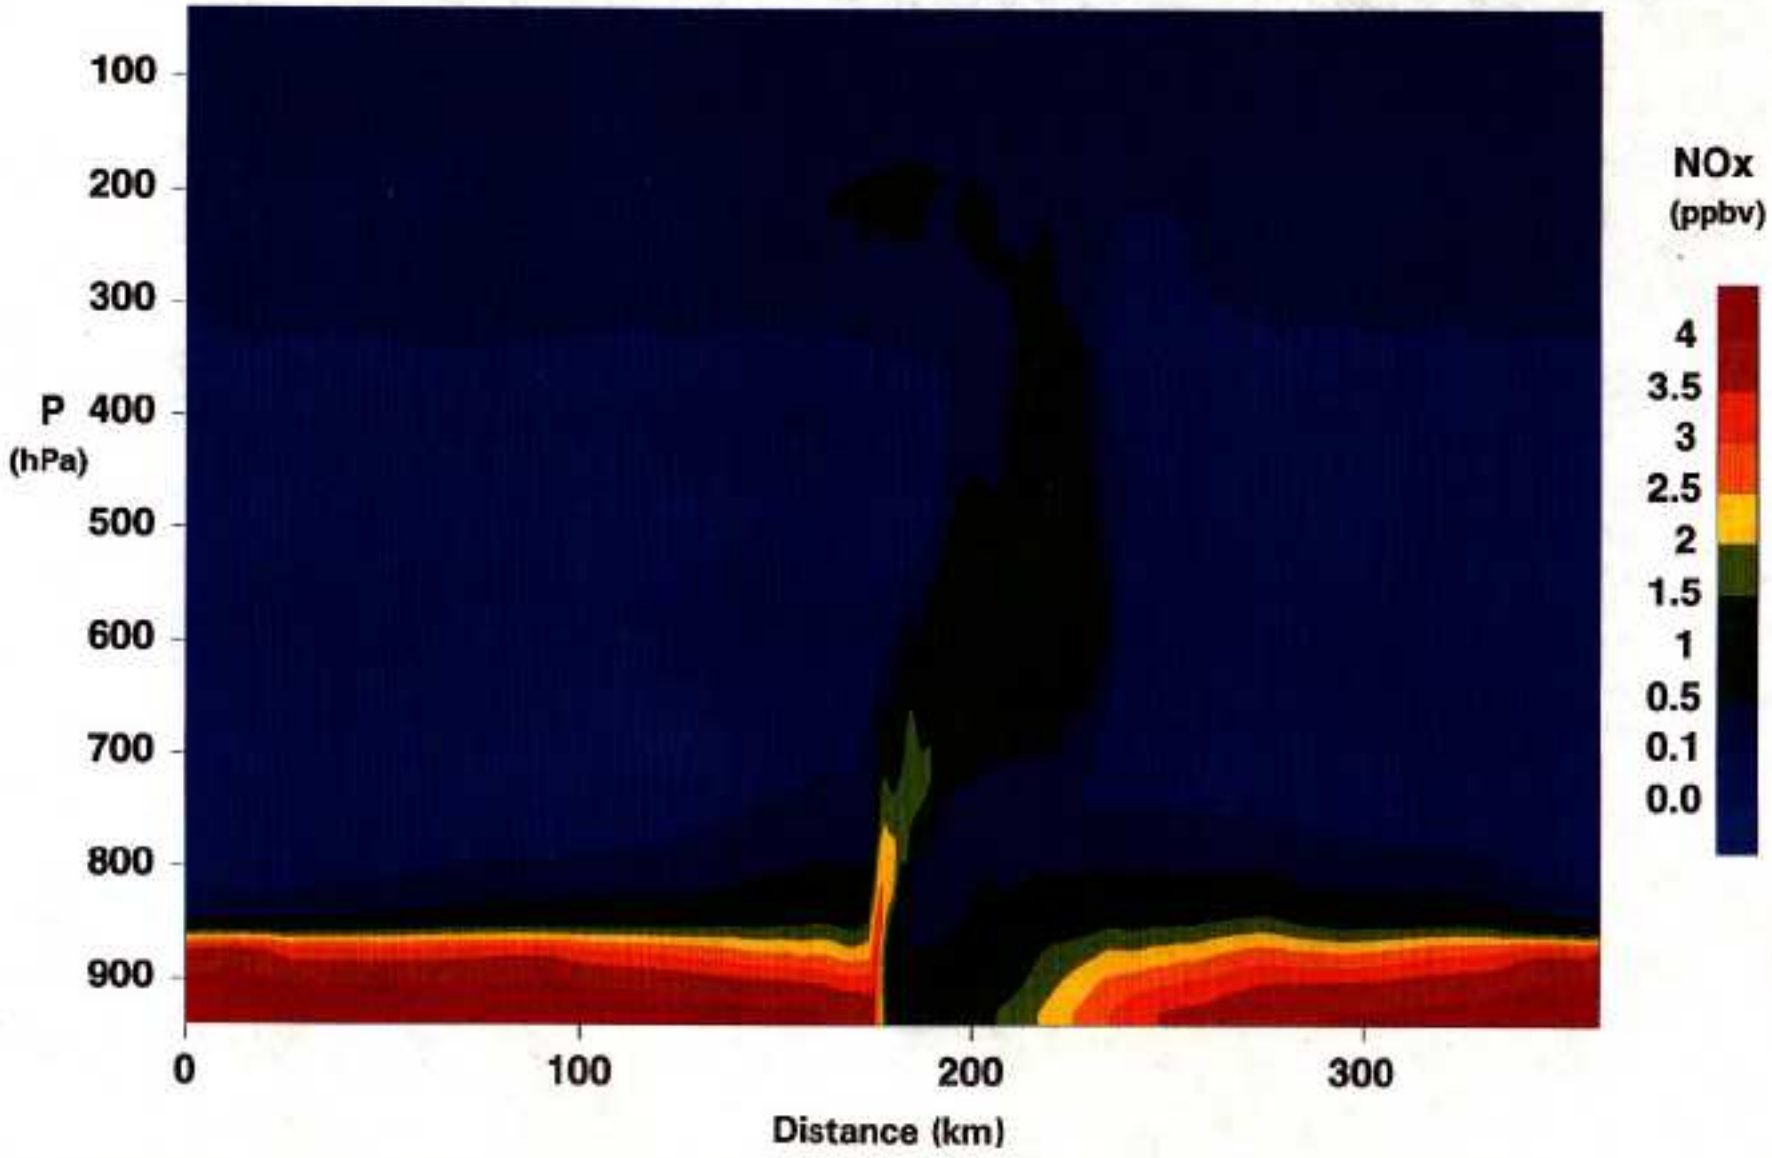

Fig. 3 Tracer simulation of NO_x from 2D version of GCE. Units - pptv. Simulation for ABLE 2B event, 26 April 1987. Cross-section at 6 hours is shown, with initial values (near left) at 2 hour point in simulation. Based on NASA Electra NO measurements below 6 km of pollution from Manaus, Brazil, plume (see Pickering et al, 1992a).
